

The Lighthouse In Orbit

The Lighthouse is featured in an actual mission patch from the March 23, 2016 launch to the International Space Station

Preparing to launch from Complex 41, Cape Canaveral Air Force Station

Cygnus cargo spacecraft docking with the International Space Station

This mission patch was designed by Orbital ATK employees and used for the March 23, 2016 flight of their unmanned resupply spacecraft, *Cygnus*, to the International Space Station. They included the Lighthouse as a familiar Cape Canaveral landmark near their launch pad, which is just down the road from where you're standing and can be seen from the top of the Lighthouse.
